

When congressional appropriations expire in September 2010, Colonial NHP, its local partners, and federal and state grant programs are not expected to be able to fund and operate the HTS/JAS systems at the current level of service. Thus, the Volpe Center was tasked with the following items: • To document the existing transportation conditions at Colonial NHP; • To evaluate the HTS/JAS systems in terms of operations, costs, and traveler demand; • To document the existing funding situation and investigate alternative scenarios; and • To document alternative service concepts. This report is the culmination of the Volpe Center's analysis of the existing Colonial NHP alternative transportation system. Based on this analysis, this report suggests possible strategies to continue running it in the future. The report is designed to provide a basis on which to set goals, develop and evaluate alternatives, and ultimately improve access and mobility at Colonial NHP for all visitors.
