

The Conserving Earths Biodiversity CD-ROM is an entirely new way to study and teach conservation biology and environmental science. Created from the ground up to make the most of today's multimedia technology, it provides a rich learning experience and a wealth of valuable information and materials -- including interactive models that allow learners to study dynamic systems, detailed maps, and links to resources on the World Wide Web -- that build upon and enhance traditional approaches to the subject. Conserving Earths Biodiversity is a pioneering educational tool based on the teachings and writings of renowned biologist Edward O. Wilson, and created and developed by science educator Dan Perlman. The program's insightful pedagogy combined with a unique use of multimedia makes it an ideal complement to any standard textbook.

Mapping Earth's Species to Identify Conservation Priorities of all species by the end of this century, said E.O. Wilson in the New York Times. Half-Earth proposes an achievable plan to save our imperiled biosphere: devote half the surface of the Earth to nature. In order to stave off the mass extinction of species, including our own, we must move swiftly to preserve the biodiversity of our planet, says Edward O. Wilson in his most impassioned book to date.

Biodiversity Days are focused on cultivating awareness and promoting understanding as a key foundation for engagement, action and inspired care of our planet. The theme of Biodiversity Days was Half-Earth, E.O. Wilson's call to save half the Earth for the rest of life.
