

While large-scale dam projects can provide many benefits, such as preventing flooding, providing irrigation, and supplying hydropower, they can also cause human and environmental destruction. Millions of people in developing countries have been displaced and have lost their livelihoods as a result of the building of dams and reservoirs. Supported by detailed case studies of real-world dam projects, including the Aswan High Dam in Egypt and the Three Gorges Dam in China, this book examines some of the major issues and impacts associated with dams and hydropower today. Sidebars, fact boxes, and quotes illuminate the problems and benefits of this type of development. A debate activity engages readers in making decisions about a new dam project.

Art Nouveau Stencil Designs in Color (Dover Pictorial Archives), The Age of Wire and String, Bitter Moon (The Huntress/FBI Thrillers), Wilde Riders (Old Town Country Romance) (Volume 1), Gabes Spring Cleaning Adventure - Early Reader - Childrens Picture Books, Beyond Temptation: Beyond #3.5, The Night Before Kindergarten,
