

Not too long ago, lethal infections were feared in the Western world. Since that time, many countries have undergone a transformation from disease cesspools to much safer, healthier habitats. Starting in the mid-1800s, there was a steady drop in deaths from all infectious diseases, decreasing to relatively minor levels by the early 1900s. The history of that transformation involves famine, poverty, filth, lost cures, eugenicist doctrine, individual freedoms versus state might, protests and arrests over vaccine refusal, and much more. Today, we are told that medical interventions increased our lifespan and single-handedly prevented masses of deaths. But is this really true? Dissolving Illusions details facts and figures from long-overlooked medical journals, books, newspapers, and other sources. Using myth-shattering graphs, this book shows that vaccines, antibiotics, and other medical interventions are not responsible for the increase in lifespan and the decline in mortality from infectious diseases. If the medical profession could systematically misinterpret and ignore key historical information, the question must be asked, "What else is ignored and misinterpreted today?" Perhaps the best reason to know our history is so that the worst parts are never repeated.

The Case for Jesus the Messiah, Ariel 2016 Weekly Calendar: 2016 weekly engagement calendar with a cover photo of Ariel from Ralphies Retreat - A pawitive alternative for cats with feline leukemia. (Cats of Ralphies Retreat), Come Into The Sun, Selma Lagerlf (Swedish Edition), Bacteria and their product, Do Outro Lado do Rio, Entre as Arvores, College Reading and Study Skills, 8th Edition, Your First Interview, Third Edition (Your First Series),
