The connection is a minor thing, but it is part of a related concept that will include several different world settings with a similarly named main character. Consider these stories to be alternative universe settings with a similar main lead. They are a collection of What if stories with a main character that has a lot in common with the other similarly named main characters, but each is their own existence with their own unique back story. Each story will also have their own litrpg style of telling, and the game concept is different in each one.
