

Use this to start your garden today! This e-book also introduces creative ideas beyond designing a garden, for surely the gardener knows what she would like to plant or has an idea of what she would like to plant. This is not only a relaxing hobby but also a potentially lucrative one. This e-book introduces the beginning gardener to the basics, but moreover, is meant to get the new gardener into a mindset of thinking about the garden holistically, from the foundation up. While any new gardener can run out buy seeds, plant a patch in her backyard, water, and hope for a good turn out, a prepared gardener doesn't really on chance. A garden isn't merely plants: it a tiny ecosystem. It is the soil, the insects, the weather, and the sun. It is also the gardener too, because she interacts with the garden and her actions have a direct affect on it. How well they interact will determine the success of her garden. While no one person can change the course of the weather or deter acts of God, one can dedicate time and effort to ensure that, barring freak accidents, a garden comes to life in all its splendor. Here is a little of what you will learn... How much time it takes What you want out of it Types of plants Design of your garden Pest control Harvesting your goods Making money from your garden Climate conditions Much, much more!
