Golzup Vol 14 - Cyber Security Test and Evaluation with UberScan technology for independent computer system threat and vulnerability assessments (with 9 discrete service offerings). Frank McIntire & business colleagues implement the Alaska Native Transformation Agenda to grow and support shareholders and their families who are participating in the global economy through acquisition, commerce, education, technology, and leader development. We manage change that is needed to address things like government budget crisis and emerging new technologies and markets that do not rely on government spending. We salute the tribal and business leaders who serve the greater good of the Alaska Native community to apply the Alaska Native Claims Settlement Act of 1971, and who provide financial, educational, and leadership guidance. This results in a current reality and future characterized by hope and well-being for Alaska Native shareholders, family members, and children (future leaders). For CyberSecurity, we team up on the development and deployment of the UberGuard Security Operations Center (SOC) and UberScan technologies (onsite and offsite) to support continued growth and expansion nationwide and worldwide. UberScan technologies are proprietary systems backed by nationwide sales and marketing to Federal Government customers, state and local government, and small- and medium-sized business clients.
