

Constantine Grewingk, who later became one of the Empires leading scientists, had gathered and organized everything that Russia knew about the geology of Alaska in 1850. In this book he provides an extensive analysis of mineral samples sent to St. Petersburg by explorers, as well as an exhaustive examination of all of the publications relevant to geology and geographical exploration up to that time. Grewingks catalog and evaluation of all known volcanic activity, including that before the arrival of the Russians, is unique because of his use of Native oral traditions gathered by explorers and clerics. He also describes, for the first time, phenomena that are often assumed to have been discovered only after the sale of Alaska, including specific copper, coal, and gold deposits. In addition to creating the first published mineralogical maps of the Alaska territory, Grewingk develops some of the earliest theoretical accounts of Alaska fossils, volcanoes, and the concept of the Bering Land Bridge. This much-anticipated translation will be valuable to readers interested in Alaska natural history, geology, minerology, Russian America, and the history of science.

Enoughs Enough and Other Rules of Life, Les enfants de la terre - Tome 4 - Le Grand Voyage, The Jaguar Prince, Swamp Thing No. 3 (2000), Every Man Knows A Woman Name Sue, Off-Road Bike Racing and Preparation,
