

The book has been highly successful in France, where it is in its seventh edition. It has been translated into Russian, Polish, and Swedish. German and Hungarian translations are under preparation. Its success is due partly to the novelty of the explanation offered of the comic, and partly also to the fact that the author incidentally discusses questions of still greater interest and importance. Thus, one of the best known and most frequently quoted passages of the book is that portion of the last chapter in which the author outlines a general theory of art. Laughter decreases stress hormones and increases immune cells and infection-fighting antibodies, thus improving your resistance to disease. Laughter triggers the release of endorphins, the body's natural feel-good chemicals. Endorphins promote an overall sense of well-being and can even temporarily relieve pain.

Laughter just might be the most contagious of all emotional experiences. What's more, it is a full-on collaboration between mind and body. Although laughter is.

Although most laughter results from physical contact such as tickling, it also occurs during chasing play. In other words, unlike the norm for humans, chimpanzees breathe in and out as they produce a breathy, panting laughter. 22 May - 3 min - Uploaded by TheEllenShow Ellen has all the scientific facts, and she's ready to prove the theory!

First of all, laughter is not the same as humor. Laughter is the physiological response to humor. Laughter consists of two parts -- a set of gestures and the. You've probably heard the saying before and we will say it again, "Laughter is the best medicine." As it turns out, there's actually some scientific. There's an old saying that goes, "Laughter is the best medicine." Is it true? What does laughter do to your body? Can laughter affect relationships? Why don't you . Stress and ill health are no joke but it seems the old saying 'laughter is the best medicine' is actually not such a funny idea after all. The good.
