

Follow a polar bear cub as it takes its first steps on a journey through life on the Arctic ice and discover how the female polar bear teaches her cubs to stalk, kill and eat their prey. The book also looks at threats facing the bears. Written by natural history experts and endorsed by the Worldwide Fund for Nature, this series explores the lives of some of the worlds wild animals through their life cycles, natural habitats, food chains and the threats that they face daily. The photographs and text also highlight the drama of living in the wild.
