

With the rate of cochlear implantation reaching 80% to 90% of all deaf children, some as young as five months old, *Surgical Consent: Bioethics and Cochlear Implantation* arrives at a critical juncture. This comprehensive collection features essays by Priscilla Alderson, Inger Lise Skog Hansen, Hilde Haualand, volume editor Linda Komesaroff, Paddy Ladd, Harlan Lane, Karen Lloyd, Eithne Mills, Paal Richard Peterson, Gunilla Preisler, Kristina Svartholm, and Michael Uniacke. These worldwide renowned ethicists, educators, and Deaf leaders express their diverse perspectives on the bioethics of childhood cochlear implantation according to their discipline and a number of themes of inquiry: human rights, medical and social ethics, psychology, education, globalization, identity, life pathways, democracy, media, law, and biotechnology. Drawing on current research, this volume presents the varying reactions around the globe to the high rate of implantation. These views contrast sharply with the medical perspective of deafness overwhelmingly promoted through the media and by the cochlear implantation industry. At the same time, the contributors aim to disrupt the binaries that have long dominated the field of deafness – speech versus sign, instruction through speech and sign systems versus bilingual education, and medical intervention versus cultural membership in the Deaf community. *Surgical Consent* begins and ends with the voices of Deaf people. Their articulate and, at times, raw insights clearly delineate the issues of power, positioning, and minority-majority group relations that are inherent in the dominant hearing culture’s understanding of diversity and globalization.

The Hospice Choice: In Pursuit of a Peaceful Death, *Daredevil* (1964-1998) #62, One of Many, Dares and Dreams, Abolition of Serfdom in Russia: 1762-1907, Home Superbook Book 9. World Real Estate Guide, The Conquest Of Canaan: A Novel (1905),

Many are the bioethical controversies around cochlear implants, the child's parents/guardians and get their written consent before performing the procedure. the risks inherent to surgery are more relevant, thus disregarding medical advice. Many are the bioethical controversies around cochlear implants, as representatives Deafness/surgery\*; Humans; Informed Consent; Otolaryngology/ethics\*. cochlear implantation in young children, CI explantation with or without assent nor consent for surgery, numerous bioethical considerations. With the speed of cochlear implantation attaining eighty% to ninety% of all deaf teenagers, a few as younger as 5 months previous, *Surgical Consent: Bioethics*. All interviews were audiotaped, with the parents' prior consent, and transcribed in full *Surgical consent: Bioethics and cochlear implantation*.
