

A theory of time itself defines the way to the theory of everything. This book will take you on a journey of discovery through Special Relativity in 1905 to an intuitive understanding of gravity and beyond. Mainstream science must go through the tortuous scientific method to advance our knowledge, but scientific progress can also be made from deductive reasoning, vision and imagination as well as from mathematics. Find out why we are living in a binary universe and the explanations for some of the present day conundrums in physics. Contents include: Causality of gravitation, Wavelike time, Quantum time, Binary time, Entanglement, the quantum world
