Following the success of Lean In and Why Women Should Rule the World, the authors of the bestselling Womenomics provide an informative and practical guide to understanding the importance of confidenceâ€”and learning how to achieve itâ€"for women of all ages and at all stages of their career.Working women today are better educated and more well qualified than ever before. Yet men still predominate in the corporate world. In The Confidence Code, Claire Shipman and Katty Kay argue that the key reason is confidence.Combining cutting-edge research in genetics, gender, behavior, and cognitionâ€"with examples from their own lives and those of other successful women in politics, media, and businessâ€"Kay and Shipman go beyond admonishing women to lean in.Instead, they offer the inspiration and practical advice women need to close the gap and achieve the careers they want and deserve.
