

Not everyone is a fan of drones though, and they do worry about them. They feel that their safety and their privacy may be compromised by them. We will cover that in a later chapter. While there are some risks in place, the benefits of drones far outweigh the risk of someone using them for their own personal gain. They have been in use since the later part of the 1800s. They were used in several wars including World War I and World War II. Of course what we see today in terms of drones is far different than those early prototypes. Even if you haven't paid much attention to drones until now, they have been widely used for quite some time. We will cover the key points of their history in the next chapter. With that in mind, drones aren't to scare anyone and they aren't government spy tools on citizens. Resources Included...
