

She was desperate to get pregnant, she just didnt know about some of the drugs other side effects... Julie was a luscious woman, anxious to start a family with her young husband Mark. When they started having trouble conceiving, she started looking for a fertility aid. They didnt have the money for any of the mainstream fertility treatments. In order for her to afford something, she needed to start looking at some of the more unconventional alternatives... The website said it would work. The website claimed it was made from an herb used by the ancient Aztecs. She thought there could be no harm in trying. So she went behind her husbands back and ordered a two month supply. And within two weeks of taking it she noticed weird things starting to happen... She thought her breasts might swell - that had been one of the warnings. But she wasnt expecting some of the other side effects it would have on her. Luckily the first time it had happened, she had been alone with her husband. But then there was the time at the gym, and then it happened again in front of the construction crew... Will she end up pregnant after all of these shenanigans? And were the ancient Aztecs really this horny?

Ballerinas Dont Wear Glasses, Someone To Call My Own, Indulgence in Death, Scottish Songs and Ballads (Chambers mini guides), Amiga Printers: Inside and Out,
