

For the 2001 Dr Who spin-off, see The Stones of Venice (audio drama) The Stones of Venice is a three-volume treatise on Venetian art and architecture by English art historian John Ruskin, first published from 1851 to 1853. The Stones of Venice examines Venetian architecture in detail, describing for example over eighty churches. He discusses architecture of Venices Byzantine, Gothic and Renaissance periods, and provides a general history of the city. As well as an being an art historian, Ruskin was a social reformer. In the chapter The Nature of Gothic (from volume 2), Ruskin gives his views on how society should be organised. We want one man to be always thinking, and another to be always working, and we call one a gentleman, and the other an operative; whereas the workman ought often to be thinking, and the thinker often to be working, and both should be gentlemen, in the best sense. As it is, we make both ungentle, the one envying, the other despising, his brother; and the mass of society is made up of morbid thinkers and miserable workers. Now it is only by labour that thought can be made healthy, and only by thought that labour can be made happy, and the two cannot be separated with impunity.
