

A series of articles about the experience of being born prematurely. It describes in amazing detail the memories and trauma felt and the way through it. It is an unusual and moving book, and should be read widely - the birth took place before the use of intensive care units for such babies. When Tony was born childbirth was surrounded by very different attitudes than exist today. The shadow of enormous mortality still fell over mothers and babies, and it influenced doctors. Antibiotics didn't exist. Infant care was not developed to the degree it is now. The doctor was telling my mother and grandmother a straightforward and accepted truth of the times - Why attempt to give life to this premature and tiny baby? It will be difficult to rear, more prone to illness, and it will be harder for it to cope with life. It isn't breathing at the moment, so forget it and try again for a healthy baby. Leave it. The doctor threw his lifeless body to one side. His grandmother took the tiny body and helped it breathe. The name of that resurrection was Love.
