

THE BOOK THAT BREAKS A CRYPTOZOOLOGICAL TABOO! Do giant primates larger than gorillas, taller than Sasquatch and Yetis, still exist in the remotest corners of the globe? Famed cryptozoologists Mark A. Hall and Loren Coleman join forces to share their knowledge of this unexplored and neglected topic in cryptozoology. Bigfoot researchers have long been mystified, even embarrassed, by reports of giant hairy apes larger than Bigfoot, and as a result eyewitness reports of what Hall and Coleman call True Giants have never been fully considered in the broader zoological context. Reviewing the evidence found in traditions and footprints, folklore and sightings, the authors of this groundbreaking volume present for the first time in one place the wide-ranging argument for the possible survival of a giant species of primate that we know lived on Earth for millions of years. **MARK A. HALL** is the author of *Thunderbirds: Americas Living Legends of Giant Birds*. **LOREN COLEMAN**, author of *Bigfoot! The True Story of Apes in America* and *The Field Guide to Bigfoot and Other Mystery Primates*, Together they have been studying the question of True Giants and their kin for fifty years.
