

Expert authors bring more than 50 years of experience in veterinary neuroanatomy and clinical neurology to this book ? Dr. Alexander DeLahunta and Dr. Eric Glass offer their unique insights from both academic and practitioner perspectives. Disease content is presented in a logical case study format with three distinct parts: Description of the disorder Neuroanatomic diagnosis (including how it was determined, the differential diagnosis, and any available ancillary data) Course of the disease (providing final clinical or necropsy diagnosis and a brief discussion of the syndrome) More than 600 full-color photographs and line drawings, plus approximately 150 high-quality radiographs, visually reinforce key concepts and assist in reaching accurate diagnoses. The book comes with free access to 370 video clips on Cornell University's website that directly correlate to the case studies throughout the book and clearly demonstrate nearly every recognized neurologic disorder. High-quality MR images of the brain are presented alongside correlating stained transverse sections for in-depth study and comparison. Vivid photos of gross and microscopic lesions clearly illustrate the pathology of many of the disorders presented in the book.

Cumartesi, Hes Not Dead Yet: A true story of one familys battle against childhood cancer., Dead Men: At times ugly, but always, too very real., The Philosophical Dictionary, The Black Sheeps Redemption (Mills & Boon Love Inspired Suspense) (Fitzgerald Bay, Book 5),
