

Why? may be the most common and emotionally charged question in human experience. With the Bible in one hand and the latest scientific findings in the other, astronomer Hugh Ross tackles many of our most pressing cosmic why questions. If God made the universe, why would he make it so vast? why would he wait to bring humans onto the scene? why would he allow decay and death to be part of it? why would he let one man and one woman ruin it for everyone? why should I believe my life has any real meaning? why is the future of the cosmos so bleak? Within these pages you will find compelling answers to these questions--answers that give you reasons to believe that our finely tuned universe shouts loudly that life is more than a cosmic accident. This book will expand your mind with the universe it describes. It is a challenging, fascinating, and mind-stretching discussion of the nature and purpose of our amazing universe in the light of Scripture by one of Americas foremost evangelical astronomers.--Norman L. Geisler, cofounder and former dean of Southern Evangelical Seminary Absolutely delightful! Rosss ability to take science and show the biblical correlation in prophecy and application is unparalleled; it makes Gods wisdom and the biblical text seem so much more magnificent.--James M. Tour, Chao Professor of Chemistry, professor of computer science, professor of mechanical engineering and materials science, Rice University, Smalley Institute for Nanoscale Science and Technology A groundbreaking look at the enduring questions that confront every person regarding our existence. Utilizing todays cutting-edge scientific research from a Christian worldview, Ross offers the most developed answers to date on key concerns regarding creation, God, and humanity. This book is a must-read for anyone who craves scientific information that interacts with tough biblical issues.--John Ankerberg, bestselling author and host of the John Ankerberg Show Ross simultaneously challenges skeptics and Christians alike with his fresh take on scientific discoveries that point to the existence of God.--Ben Young, Second Baptist Church, Houston; author of Why Mikes Not a Christian
